# Aurus

The rubber for the ambitious player striving to play topspin strokes in any situation. The new technology combined with the ultra soft rubber surface provides an outstanding spin and a great playing sensation, allowing a secured and aggressive game. The integrated SPI (Speedglue-Effect-Inside) technology confers an extreme catapult reaction to the ball. Although you will use very little strength, your balls will be loaded with a lot of spin and speed. The exclusive transparent rubber surface confers stability and a long-life-expectancy. Notice the energy of this rubber after only few exchanges.

**Colours:** red, black  
**Thickness:** 1,7 / 1,9 / 2,1  
**€ 36,90**

## Aurus Soft

The softer version of Aurus offers a better control with a high ball rebound. This energy-loaded rubber is ideal for spin-rich strokes and secured topspins, while enabling good control. Aurus Soft is very well adapted to each game level for an optimal performance.

**Colours:** red, black

**Thickness:** 1,7 / 1,9 / 2,1

**€ 36,90**

## Aurus Sound

The softest version of Aurus produces a great sound and pure playing pleasure. The balanced playing sensation of the soft sponge and the elastic rubber surface were adapted to players who do not want to give up energy-loaded strokes, although missing some training hours. The SPI technology combined with the soft sponge confers an extraordinary sound. Around Sound combines sound, dynamic and the highest possible energy.

**Colours:** red, black  
**Thickness:** 1,7 / 1,9 / 2,1  
**€ 36,90**

## Speedy Spin FX Premium

Thanks to a slightly softer sponge underlay, Speedy Spin FX Premium confers more elasticity and rotation. If your orientation is a rich topspin offensive game, you should be looking forward to playing with this rubber because it will enable you to realise a much curved ball trajectory, with lots of dynamic and high control. Speedy Spin FX Premium is a hardwearing quality rubber. Even in modern times, this rubber remains a classical rubber, bringing lots of joy and variety into the game.

**Colours:** red, black

**Thickness:** 1,5 / 1,7 / 1,9 / 2,1

**€ 32,90**

## Grip-S Europe

Grip-S Europe was developed in combination with Vladimir Samsonov and adapted to his personal requirements in order to produce a high-performance rubber. The rubber convinces by its high catapult effect and compared to the regular Grip-S, Grip-S Europe confers more dynamic and speed. Under extreme strokes the ball contact onto the stable and adhering rubber surface is unequalled and opens even in almost desperate situations, absolute new possibilities. We have integrated the revolutionary RPS – Sponge- Technology into Grip-S Europe, thus enabling the energy transfer to have an absolute optimal effect on the speed of the ball rebound and on the ball trajectory. With this rubber you are best equipped for a variety-rich serve and return game.

**Colours:** red, black  
**Thickness:** 1,8 / 2,0 / max  
**€ 39,90**

## Grip-S Europe Soft

The softer RPS sponge version of this rubber confers more sensation and flexibility than Grip-S Europe. The RPS technology (efficient energy transfer means optimal balance between speed and ball curve) is synonymous of pure playing pleasure. Grip-S Europe Soft is conceived for the player privileging mid-distance games, allowing dynamic topspins, a good control and lots of rotations.

**Colours:** red, black  
**Thickness:** 1,8 / 2,0 / max

## IV-L SGS

Our classical IV-L and IV-S are now also available with a newly developed comfort grip system, the so-called SGS (Sponge-grip-system). With IV-L SGS we did not make any changes to the classical composition of the blade's unique and especially selected Ayous layers. Our researches and tests commonly developed with world class players resulted in a newly developed racket shape adapted to the grip shape, making the interval "control – acceleration" even bigger. The new grip system gives the necessary impulse to your hand.

**Ply:** 4-ply  
**Grips:** concave, anatomic, straight  
**€ 32,90**

## IV-S SGS

The offensive Ayous layer combination is now also available with the new SGS grip comfort system. The optimised racket shape adapted to the grip shape will permit the full use of your offensive potential, without having to give up the unique soft-fast playing sensation. Once in your hand, you won't give it away anymore!

**Ply:** 5-ply  
**Grips:** concave, anatomic, straight  
**€ 32,90**

## Samsonov Alpha SGS

Fine 5-ply wood meant for the diversified and attacking offensive allrounder. It impresses by an extraordinary ball control and the optimal speed potential. If you focus on precision, Samsonov Alpha SGS is made for you

**Ply:** 5-ply  
**Grips:** concave, anatomic, straight

**€ 35,90**

## Samsonov Carbon SGS

If you place speed and aggressiveness in your game among everything else, then Samsonov Carbon SGS is made for you. This blade is based on a classical IV-S blade with its soft-fast Ayous layers in which 2 additional carbon layers were integrated. The result is a fabulous and fast Ayous blade with the SGS System that gives the needed impulse to the hand, while keeping the control; at ball contact, the blade will not feel too stiff.

**Ply:** 7-ply  
**Grips:** concave, anatomic, straight  
**€ 58,90**

## Samsonov Force Pro

The new blade of the multiple European Champion and World Cup winner impresses by its varied speed reserves. The Limba outer layers confer its perceptible power. The midst and central layers permit an excellent ball control to put your adversary under pressure.

**Ply:** 7-ply  
**Grips:** concave, anatomic, straight

**€ 41,90**

## comBAT

This 7-ply wood with stiff outer layers and relatively soft inner layers possesses a high potential of dynamics. It's the ideal weapon for a topspin-rich offensive game. Grip and racket shape are perfectly harmonised and confer an extraordinary balance. Thanks to the varnished surface, Combat is a strong and hard-wearing blade.

**Ply:** 7-ply  
**Grips:** concave, anatomic, straight

**€ 34,90**
